EXPERIENCE

Founder

Ushiro Labs

October 2025 - Present, Remote, US

- Started an online business to help with end-to-end automation systems and business operations for SMB clients, eliminating manual workflows and driving measurable efficiency gains across operations, client intake, and file management.
- Designed and implemented a fully automated intern-selection pipeline for a Chicago emergency veterinary hospital: aggregated evaluations from 10+ physicians, summarized written feedback via a python script calling a Locally hosted LLM, averaged candidate scores, and generated ranked output for all 40+ applicants, reducing a multi-day manual process to minutes.
- Overhauled backend operations for a wedding planning firm: audited and restructured their file management system, optimized their website for conversion, and built a zero-touch proposal pipeline that auto-populated contracts from an inbound inquiry channel (website, Instagram, Facebook), routed approvals, and triggered automated sends, saving 3+ hours per client inquiry.

Business Operations Generalist

Flashbots

June 2025 - October 2025, Remote, US

- Automated quarterly option grant generation, cutting manual workload and errors by 90% and expediting board approvals.
- Built a Notion-based operations hub centralizing documentation, tools, and workflows for team efficiency; scaled process documentation from <10 to 60+ standardized workflows across the operations division.
- Audited and optimized internal software and services tracking, doubling transparency and eliminating redundant services.
- Partnered with the board of directors to streamline equity-options governance and deliver audit insights shaping strategic decisions.
- Supported preparations for the company's Series C Fundraise, coordinating operational documentation and strengthening readiness across finance and governance systems.

Structure & Payload Design Engineer

The Boeing Company - Boeing Defense, Space, & Security

May 2023 - April 2025, Huntsville, AL

- Directed procurement and installation of rocket hardware, driving alignment with technical specifications and budget constraints, resulting in a 30% reduction in lead times.
- Led a team of 15 part-time college students, managing task delegation, timelines, and engineer coordination while overseeing funding and maintaining efficient resource allocation within budget constraints.
- Mentored and developed two interns by offering training, feedback, and career development advice, cultivating their engineering skills and growth.
- Orchestrated a six-month initiative across engineering, procurement, and quality teams to design and implement protective sensor covers for space charging applications; Achieved successful testing outcomes that enhanced overall reliability of sensors by 100% in the space-charging environment.
- Produced detailed planning documents that translated engineering designs into step-by-step assembly instructions, safeguarding accurate and efficient integration onto the rocket, expediting installation times by up to 25%.

Teaching Assistant (Grading Focus)

Iowa State University

August 2022 - December 2023, Ames, IA

- Managed academic assessment for a cohort of over 230 students; developed grading rubrics that reduced grade disputes by 80%.

PROJECTS

AI Meeting Notetaker

November 2025

- Built a local hosted AI powered meeting assistant using Whisper (speech-to-text), Qwen2.5:7b (summarization), and a custom Python pipeline, automatically generating per-speaker transcripts, audio recordings, and structured meeting summaries.

Senior Capstone

Manager & Chief Engineer

January 2023 - December 2023

- Led a team of 13 engineers in designing, prototyping, and producing a small Unmanned Aerial System (UAS) ahead of schedule and 10% under budget.
- Provided technical leadership to subteams, resolving design and development challenges to achieve optimal performance, innovation, efficiency, and quality in propulsion and structural components.
- Conducted risk evaluations and deployed mitigation strategies to address potential delays or technical issues, preventing technical issues in 95% of identified high-risk scenarios.
- Compiled and presented comprehensive project documentation, ensuring compliance with technical standards and facilitating future research and development efforts.

SKILLS

Software: Notion | Zapier | N8N | Slack | Google Suite | Microsoft Office | AI LLMs | Automation Tools

Interpersonal: Russian (Fluent) | Leadership | Strategic Operations | Process Optimization | Cross-Functional Coordination

EDUCATION

Bachelor of Science in Aerospace Engineering

Iowa State University • Ames, IA
